

PROFILE

Developer advocate and hands-on PHP/Symfony architect with a strong background in open-source CMS ecosystems (eZ Publish / eZ Platform). Experienced in consulting, audits, migrations, training, and enabling teams through tooling and automation.

CORE SKILLS

Architecture & Delivery

- Solution architecture, technical design documentation, target system diagrams
- Project organization, development practices, DevOps support
- Implementation of complex / critical components
- Technical leadership (lead dev, mentoring, coaching)

Consulting & Enablement

- Open-source CMS strategy consulting, audits, recommendations
- Functional & technical analysis, specifications, RFP support
- Acceptance testing, incident & bug tracking
- Training delivery & content creation (60+ sessions)

EXPERIENCE

Advocacy Engineer — Platform.sh / Upsun

Jul 2022 – Present

- **Conference speaker** and developer-facing advocate: talks, demos, technical content, and community engagement.
- Built and shipped **internal tooling** that measurably improves daily workflows across teams:
 - **Technical blog publication calendar** with a GitHub-based workflow and drag & drop PR planning.
 - **Automated image-version inventory** (Upsun) with automatic documentation updates.
 - **Upsun PHP SDK** (open source): packagist.org/packages/upsun/upsun-sdk-php
 - **Upsun PHP Node** (in progress, open source)
 - Implemented **llms.txt** on Upsun Docs and devcenter.upsun.com to improve LLM-aware documentation discovery.
- **Documentation maintenance**: continuous improvement, updates, and technical accuracy across developer-facing docs.
- **Events & live demos**: acting as a “*demo machine*” — delivering reliable, hands-on live demonstrations during conferences, and internal/external events.
- Active **contributor** and cross-team partner (engineering, docs, support, marketing, product).

Entrepreneur, Consultant, PHP/Symfony/eZ Architect, Trainer — Code Rhapsodie

Apr 2017 – Dec 2020

Consulting and architecture (PHP, Symfony, eZ Publish / eZ Platform): project support, lead dev, code audits, training, DevOps, development.
